Subject: Adress no. E-49970238-180.5-00080635155-Verification of Certificate of Origin No. 952  
Adress no. E-49970238-180.5-00080627544-Verification of Certificate of Origin No. 971  
Adress no. E-49970238-180.5-00080961213-Verification of Certificate of Origin No. 1029  
Adress no. E-49970238-180.5-00080882697-Verification of Certificate of Origin No. 1031

Dear Sir/Madame,

Following your request, we inform you that:

1) The Certificates of Origin No. 952, 971, 1029, 1031 / 2022 were issued by our institution at the request of SC ETNOCULTURA SRL. We hereby certify that The Certificates are authentic.

2) The above mentioned company owns a textile fabric factory and is an **ACTIVE PRODUCER** of polyester or cotton yarn fabrics, bleached, natural or colored in its own weaving. All technological processes are integrated and the raw material is polyester, cotton or mixed yarns, bleached or colored.

In the following you will find a short presentation of ETNOCULTURA SRL, and of its production process:

**ETNOCULTURA SRL is one of the most important Romanian producers of textile fabrics. It benefits from the expertise of highly experienced specialists, transferred from one of the largest fabric factories in Eastern Europe - NOVATEX SA, with a tradition of over 100 years in the field, from whom we took over some of its production facilities.**

The range of fabrics we produce is made to the latest technological standards in the field, corroborating both the experience of its own specialists and partners from countries with a tradition in the textile industry such as Turkey, Italy, Portugal, France or Bulgaria.

The factory uses dyed or bleached polyester yarns, purchased from Romania, Portugal, Belarus and Italy to produce mainly fabrics with HS code 5407.5200, HS 5407.5100 and HS 5407.6100.

Also produces a range of Balkan cultural confluence fabrics made of cotton yarn supplied from Turkiye by the company Cotton Trade SRL.

ETNOCULTURA together with European partners produces over 15M sqm of fabrics annually to the Oeko Tex standard and is a founding member of the international partnership lohncontrol.com. This partnership means over 2000 top companies in the textile industry with over 2,000,000 employees or collaborators.

The technological manufacturing processes are the following:

ÎMPREUNĂ PENTRU AFACEREA TA

1. Strip warping operation with high-speed sectional warp Textima of dyed or bleached yarns.
2. Weaving with 12 Sulzer 216 C weaving machines with an average capacity of 450-500 kg / machine / day in 3 shifts.

The use of dyed or bleached yarns means the production of ready-made fabrics.

3. Technical quality control operation to eliminate weaving defects performed on the technical control frame.
4. Metering operation, to determine the length of each roll of fabric.
5. Packaging operation of rollers metered in PE foil.
6. Fabric rolls labeling operation.

The factory has storage capacity in conjunction with the production and has 50 employees distributed in three shifts to ensure a continuous flow of production.

3) In order to verify the veridicity of the above presentation, the representatives of Chamber of Commerce, Industry and Agriculture Arges went on the field and inspected the production site of ETNOCULTURA SRL.

You can find attached few images from the production site, following the processes of production as they were described above.
